“The Monthly Dose”

Research = Medical Advancement

Overview of Clinical Research

Clinical trials are conducted to test the safety and effectiveness of new drugs and treatments or to develop new uses for existing drugs and treatments. These trials are conducted at approved sites under the close supervision of physicians (also called “investigators”) and other research professionals.

By participating in a clinical trial, you can help in the development of medical advances that can help you, as well as millions of others, by finding better treatments, and even cures, for life-threatening and chronic diseases.

Medical researchers are constantly looking for better or new ways of treating illness and disease. New and improve medical discoveries can not be put into general use until controlled testing has been done on actual patients.

Clinical trials are the only way that testing can be done. The Food and Drug Administrations (FDA) requires clinical trials to be done before it will approve new treatment as safe and effective for public use.

MEET OUR STAFF

- Dr. Bhupinder Singh
Medical Director
- Monique M. - RN
Sr. Clinical Coordinator
- Heather H. - RN
Sr. Clinical Coordinator
- Charmaine M.
Sr. Clinical Coordinator
- Renee F.- RN
Sr. Clinical Coordinator
- Carrie G.
Clinical Coordinator
- Nancy-Michele M.
Regulatory/QA
- Nathan C.
Clinical Coordinator
- Monica L.
Clinical Coordinator Asst
- Gurpreet S.
Data Entry Specialist
- Meera R. - DES
- Robin F.
Recruitment Coordinator
- Robyn D.
Administrative Asst.
- Grace H.
Lab Assistant

Recent Events and News

On May 10, 2011 Southwest Clinical Research LLC, hosted a dinner event for called “Generation Celebration” for patients who are 85 years and older and living with CKD. There were 25 attendees and entertainment provided by Dr. Lindsay A. Lafford, Lord of Ridley, who is 98 years old along with Lloyd Boyd who is a flutiest and is 88 years old. It was amazing to hear each and everyone’s stories and their secrets on how to live such a long fruitful life with CKD. All patients contributed their success to their healthy happy lifestyles, and their Nephrologist Dr. Singh. It is an honor to work with such a well respected doctor.

- “Kept a positive mental outlook under all circumstances. Enjoyed my father’s home-made wine. Always partake of good, extra virgin, first cold pressed olive oil on a daily basis . Great marriage and two wonderful daughters”. AGE: 85 Denny Pantelopous

Current and Upcoming Research Programs

We are currently looking for volunteer participants with the following criteria

- TYPE II DIABETES
- CHRONIC KIDNEY DISEASE
- KIDNEY FAILURE REQUIRING DIALYSIS
- POLYCYSTIC KIDNEY DISEASE
- LUPUS NEPHRITIS

CALL ROBIN FOSS, RECRUITMENT COORDINATOR for more information 480-610-6125

- Behind every medical advancement, there are volunteers who take part in clinical research studies...

Who Can Participate?

Each trial has different guidelines to determine who is eligible. These guidelines are usually based on several characteristics including a candidate's type of disease, current medical condition, medical history and age. A member of our research staff or doctor will perform a thorough physician exam and medical history to determine if you are eligible to participate.

Qualified study participants will receive study medication, study-related examinations and lab work at NO CHARGE and BE REIMBURSED for your time and travel.

CALL ROBIN FOSS, RECRUITMENT COORDINATOR for more information 480-610-6125
